ANNUAL REPORT
OF THE
INSPECTOR OF DIVISION COURTS
FOR THE
PROVINCE OF ONTARIO,
FOR THE YEAR
1896.

OFFICE OF THE INSPECTOR OF DIVISION COURTS,
PARLIAMENT BUILDINGS, TORONTO, Dec. 31st, 1896.

To His Honor,

THE HON. G. A. KIRKPATRICK,
Lieutenant-Governor of Ontario.

MAY IT PLEASE YOUR HONOR :

I have the honor to submit the following report upon the Division Courts of the Province of Ontario, for the year ending 31st December, 1896.

Full details will be found in the tabulated returns of the business transacted in these courts during the year.

In Table A will be found, under the proper heads, the number of suits entered amount of claims ; total amount of suitors' money paid into court and total paid out, and a large amount of miscellaneous information in tabulated form.

Tables B and C contain complete lists of the clerks and bailiffs of the courts, together with their post-office address, and the number of the court in the county or district where situated.

The descriptive limits of the several divisions will be found in Table D.

(The lists of officers have been corrected up to the latest moment of printing the report.)

SUITS—CLAIMS.

Exclusive of transcripts of judgment and judgment summonses, there were entered during the year a total of 52,204, for claims aggregating \$2,048,881.

AMOUNT RECEIVED AND PAID.

Total amount of suitors' money paid into court \$582,029.90. Total paid out \$579,811.77. These returns continue to shew an increased percentage recovered upon the amount of claims sued. In contrasting the amount of claims sued with the amount of cash paid into court, it has always to be borne in mind that a very large proportion of the suits are settled by the parties out of court, and that of the money which passes on those settlements no record appears in the returns made to the department. The figures given, therefore, it will be seen, by no means represent the full collecting powers of the courts.

REVENUE.

The returns of percentages payable to the Treasury give a total sum of \$6,204.75 for the year as revenue from Division Courts.

JURY TRIALS—JURY FUND.

The total trials by jury all over the Province, by juries summoned, numbered 174, and the amount paid to jurors so summoned, \$1,746.80. Amount paid to County Treasurers for Division Courts Jury Fund, \$1,808.31. As will be seen, the figures supplied by the returns support the assurance of the jury fund, proving sufficient to meet the demands made upon it.

COURTS—CHANGES.

The Wallbridge Court, No. 2, Hastings, has been discontinued, from March, 1897. A new court, No. XI, has been established in the same county, at Maynooth—to come into operation on 2nd June, 1897.

APPOINTMENTS. RESIGNATIONS, ETC.

Of clerkships, 21 vacancies occurred during the year. These were caused by 14 resignations and seven deaths. All the vacancies have been filled by new appointments.

There were 28 new appointments of bailiffs, to fill vacancies caused by 21 resignations, 2 deaths, 3 removals from office, and two additional bailiffs of courts. The figures are very nearly the same as those given for the previous year, when there were 28 new appointments of clerks and 27 new appointments of bailiffs.

LEAVE OF ABSENCE—DEPUTIES.

The necessary papers were made out and transmitted, granting leave of absence to 59 clerks and 57 bailiffs, and for the approval of the appointment of deputies.

COMPLAINTS.

There is no diminution in the number of complaints, which amounted to very nearly 200 during the past year, although in justice to the officers of the courts it should be stated that not a few of those made proved upon enquiry to be without foundation. Neglect in making prompt returns and overholding moneys of suitors, and not giving notice when required of moneys paid into court, still continue to be the most serious causes of complaint. Many complaints continue to be received from clerks against other clerks as to neglect in the payment of foreign fees. No self-respecting clerk will place himself in a position to have charges of this character sent into the Department against him. When one clerk trusts another, the debt is a debt of honor, for in such cases the sureties are not liable. Not only honor, but common honesty, therefore, demands that such personal debts should be promptly discharged, as they should be, immediately on receipt of the bill for the services rendered.

SURETIES—INSPECTION.

An increasing number of clerks and bailiffs are giving the security of Guarantee Companies for the proper discharge of their duties. This course I beg to commend as much more satisfactory than the getting of private friends to join officers in the security of personal covenants.

I am much pleased to be able to report continued improvement and efficiency in the offices inspected. Letters are daily received thanking the Department for prompt attention to and redress of complaints.

J. DICKEY,
Inspector.

LICENSE REPORT.

PROVINCIAL TREASURERS OFFICE,

LICENSE BRANCH,

TORONTO, January, 1897.

To the Honourable GEORGE AIREY KIRKPATRICK,

Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR :

I have the honour to submit the Twenty first Annual Report, and accompanying Schedules, respecting the operation of the Liquor License Laws.

NUMBER OF LICENSES.

Schedule A is a comparative Statement of the number of Licenses of the various denominations issued, and of the number extended, transferred or removed in each of the License Districts of the Province, during the past three license years, and may be thus summarized :

Years.	Licenses.							Extensions, transfers and removals of licenses.			
	Tavern.				Shop.	Wholesale.	Total.	Extensions.	Transfers.	Removals.	Total.
	Yearly.		Six months.								
	Ordinary.	Beer and wine.	Ordinary.	Beer and wine.							
1893-4	2,841	47	35	5	357	31	3,317	59	511	39	609
1894-5	2,735	50	50	4	337	29	3,205	73	550	45	668
1895-6	2,731	48	44	15	327	26	3,191	26	548	36	610

 PROVINCIAL REVENUE.

The same Schedule shews the revenue derived by the Province from Licenses and fines to have been for :

1893-4	\$289,821 02
1894-5	277,478 99
1895-6	273,212 44

LICENSES IN COUNTIES AND CITIES.

Schedule B is a Statement of the number of Licenses issued in the several Counties and Cities during the past twenty-one years.

LICENSES IN MINOR MUNICIPALITIES.

Schedule C gives in detail, as regards each City, Town, Incorporated Village, and Township, and the Unorganized Territory of the Province, the number of Licenses, and of extensions, transfers and removals granted during the past three years.

TOTAL COLLECTIONS.

This Schedule also gives the amounts collected on account of Licenses and Fines including the sums imposed by municipal by-laws, the totals of which were as follows :

1893-4	\$649,173 98
1894-5	623,717 17
1895-6	615,290 38

MUNICIPAL REVENUE.

The payments to the Municipalities are shown by the same Schedule to have been in :

1893-4	\$282,473 97
1894-5	272,101 31
1895-6	267,072 40

The amounts imposed in each Municipality by by-laws, in excess of statutory duties, are also given in this Schedule.

FINES.

The fines collected during the past year, as shewn by Schedule D, amounted to \$16,979 as compared with \$17,243.46 in 1894-5.

SALARIES OF INSPECTORS—EXPENSES OF COMMISSIONERS.

The payments under these heads are also shown in the same Schedule D.

MISCELLANEOUS EXPENDITURE.

Schedule E shows the expenditures of enforcing the Act in the several districts other than those included in Schedule D, consisting of office rent, postage, stationery, printing, advertising, magistrates, constables, witness, counsel and detective fees, etc.

COMMITMENTS FOR DRUNKENNESS.

Schedule F shews the number of prisoners committed for drunkenness during the years from 1876 to 1896 inclusive. The number committed during the year 1896 as compared with 1895 shews a decrease of 330.

The average yearly commitments for each period of five years from 1876 to 1895 inclusive are as follows :

From 1876 to 1880 inclusive	3,812
1881 to 1885 " 	4,016
1886 to 1890 " 	4,311
1891 to 1895 " 	2,703

THE INSPECTOR OF LICENSES.

The names and post office addresses of the Inspectors of Licenses are set out in Schedule G.

SPECIAL INSPECTION OF LICENSE DISTRICTS.

The special inspection of the License Districts, and the examination of the work of the license officials therein, from time to time, have been continued during the past year.

Respectfully submitted,

R. HARCOURT,

Provincial Treasurer.

The six Months' Licenses and the Licenses *extended* do not appear in the above Schedule or recapitulation, and as a consequence the total number of Licenses issued, according to the Statement, does not correspond with the number as shown in Schedules A and C. Beer and Wine Licenses are included with the ordinary licenses, under the heads of Tavern Licenses and Vessel Licenses respectively. An *extended* License is good for a period not exceeding three months. It is not in the nature of a new license, but simply a permission, granted by the Board of Commissioners, to the holder of a license expiring in April, to continue his business under the old license for the specified period, that he may be enabled to dispose of his stock on hand and quit the business without loss. Six Months' Licenses run from the first day of May to the thirty-first day of October, and are not valid after the latter date. They are granted in localities which are largely resorted to in summer by visitors, where the Board of Commissioners are of opinion that increased tavern accommodation for the summer months is necessary.

SCHEDULE C.

COMPARATIVE STATEMENT BY MUNICIPALITIES, showing the number of Provincial Licenses, whether Ordinary or Beer and Wine, issued, and the number extended, transferred or removed, the gross sums deposited to the credit of the License Fund Accounts therefor, and for fines, the amount imposed by municipal by-laws for licenses in excess of statutory duties, for 1893-4, 1894-5 and 1895-6, and the revenue paid over to the municipal treasurers during the license years 1893-4, 1894-5 and 1895-6, respectively,

REPORT
OF THE
COMMISSIONER OF PUBLIC WORKS
FOR THE
PROVINCE OF ONTARIO
FOR THE YEAR ENDING 31st DECEMBER,
1896.

To His Honour GEORGE AIREY KIRKPATRICK,

Lieutenant-Governor of the Province of Ontario, etc.

In compliance with the provisions of the Statute in that behalf, I beg to submit the reports of the Departmental Architect and the Departmental Engineer on the public buildings and works under the superintendence and control of the Public Works Department; and the Accountant and Law Clerk's usual statement of expenditures, etc.

The report of the Architect gives full details of the works in connection with the several public institutions, and of the Legislative and Departmental and other Provincial buildings.

The Engineer's report contains details of the works connected with the construction and maintenance of the several locks and dams, and the swing and fixed bridges crossing same; and of the various timber dams and slides, and the works of deepening and otherwise improving channels of the Provincial inland navigable lakes and rivers; also tabulated statement of all railways completed in the Province, and the number of miles of railway now under construction.

The Accountant and Law Clerk's statement (Nos. 1 and 2) show the expenditures on capital account on public buildings and works during the year 1896 and the total expenditures on same from Confederation to date of this report; also a statement of all contracts and bonds entered into with Her Majesty during the year 1896.

Respectfully submitted,

WM. HARTY,
Commissioner.

DEPARTMENT OF PUBLIC WORKS, ONTARIO,
31st December, 1896.

REPORT
OF
THE ARCHITECT.

DEPARTMENT OF PUBLIC WORKS, ONTARIO,

Toronto, December 31st, 1896.

HON. WILLIAM HARTY,

Commissioner of Public Works, Ontario :—

SIR,—I have the honor to present the following report of the work done by this branch in constructing, altering and repairing the various buildings, etc., under the control of this Department during the past year :

ASYLUM FOR INSANE, TORONTO.

An addition has been built to coal vault, the work being done by institution labor. Repairs were made to roofs, and a covering of cement put on roofs of Cottages A and B, and to roofs of laundry and ice-house.

ASYLUM FOR INSANE, MIMICO.

Plans and specifications were prepared by the Department for a chapel and assembly hall, the first floor of which will be occupied as a storehouse, with ample storerooms, storekeeper's office, boiler room, coal vaults, etc. A spacious auditorium is located on the upper floor with chancel and vestries at the south end, and platform at the north end with two convenient ante-rooms adjoining and staircases from each leading directly to the ground. There are also separate staircases at each side of the north end for patients, leading directly to the outside, making in all four exits from the auditorium. The building will be heated with steam or hot water, and when completed will adequately fill the requirements for which it is being erected. The foundations and a portion of the brick work has been constructed and the drains laid, the greater part of the work having been done by institution labor in a satisfactory manner. The work has been properly covered for protection from frost, etc., during the winter months, and building operations will be resumed as soon as the weather permits.

A duplicate pump has been placed in the pumping station. Specifications were prepared for same, tenders received, and the contract awarded to Mr. A. J. Nie, of Hamilton, his being the lowest tender. The work has been properly done and the pump is working satisfactorily.

The woman's pavilion has been completed.

The hot water heater, which is heated by exhaust steam from the engine, was purchased from the Polson Iron Works of Toronto.

A few necessary repairs have been made to the buildings.

Owing to additional buildings having been erected, the electric plant had become inadequate, and in view of the chapel and assembly hall being lighted, it was found necessary to increase the capacity to the extent of putting in a 500 light auxiliary dynamo. The dynamo has been purchased from the Royal Electric Company, to whom the contract was awarded after tenders had been received, theirs being the most satisfactory.

ASYLUM FOR INSANE, LONDON.

An addition is being built to the Farmer's House, plans and specifications for same having been prepared in the Department, and the work being partially done by institution labor.

Plans and specifications were prepared and tenders received for a porch to the front entrance of the north building, the old porch being so badly decayed as to necessitate its being taken down. The contract was awarded to Mr. William Gerry of London, whose tender was the lowest, and the work has been satisfactorily done.

The machinery for agitator in sewage tank has been placed, and some necessary repairs made to the eaves and conductor pipes of buildings.

A considerable portion of the fence to grounds was renewed, and new gates of iron are being placed to main entrance, the work being done under the Inspector's Department.

ASYLUM FOR INSANE, HAMILTON.

The construction of the infirmary building in connection with the Asylum has been continued throughout the season, and it is now roofed in and the plastering finished. Operations will be continued and the work pushed to completion in the early part of the coming year.

A steam connection pipe has been taken from the west boiler house at main building to the fire pump in the fire pumping station, and a branch from same continued from kitchen of East House to supply steam for heating cooking kettles, which have been set up in the kitchen, the work being satisfactorily done, partially by institution labor and by day's work by men under the plumber of this Department.

A duplicate pump has been erected at the pumping station on Queen street, the work being carried out in a satisfactory manner, by Mr. A. J. Nic, of Hamilton, to whom the contract was awarded after tenders had been duly received, his being the lowest. It was also found necessary to make extensive repairs to the old pump, which had seen hard service and done good work for many years.

An addition has been built to the piggery in connection with the farm buildings.

Porches have been erected to east and west entrances of East House and alterations have been made to upper floors in front of main building, the windows being enlarged and openings formed to give additional light to corridors, the plans and specifications for which were made in this Department.

Necessary repairs have been made to the eaves, conductors, etc., of the roofs of the various buildings.

ASYLUM FOR INSANE, KINGSTON.

Plans and specifications were prepared for an addition to the east wing of the main building, and tenders called for, the contract being awarded to the lowest tenderer—Mr. William Garson, of St. Catharines. Work was commenced early in June, the excavations for the foundations having been previously done by institution labor under a foreman. The building is practically completed, with the exception of the heating and plumbing, which will be put in as soon as the appropriation for same is passed by the Legislature, and the work will be finished early in the season. This addition has been erected to give the necessary accommodation for w. c.'s and bathing and will be fitted up on the several floors with a douche system of bathing apparatus, which is extensively used in similar institutions in the United States, and the other fixtures will be the most modern of their various kinds.

The walls of ice-house and coal vault, being a portion of the original building, some of which had fallen, and others which were in danger of falling, had to be taken down and rebuilt, which has been done in a most substantial manner. In rebuilding the ice-house the walls were carried to the same height as the walls of coal vault adjoining, in order to provide additional space for storage.

Considerable pointing has been done to the joints of stone work of main and outbuildings, which had been damaged by the weather, the work being satisfactorily performed by men in the employ of the Department, a competent foreman being placed in charge.

ASYLUM FOR INSANE, BROCKVILLE.

Plans and specifications were prepared for a residence for the medical superintendent, tenders were received, and the contract awarded to Mr. T. H. Fitzgibbon, of Brockville, his being the lowest tender. The work is well advanced and will be finished in the spring. Drainage, water supply and gas pipes to residence have been laid, as also an intercepting and main drain 1,083 ft. in length, which is connected with the sewer; a portion of the work having been done by institution labor and the remainder by day's work in a satisfactory manner by men employed by the Department under the clerk of works.

Considerable work has also been done by the Inspector of Asylums in paving yards of farm buildings under the superintendence of the clerk of the works in charge of the medical superintendent's residence and other works in connection with this institution.

Some necessary repairs have been made to the different buildings.

ASYLUM FOR IDIOTS, ORILLIA.

Extensive repairs have been made to the galvanized iron work of roofs of the main building and passages connecting with the cottages, which had been damaged by the heavy snow storms last winter. Specifications were prepared and tenders duly called for, the contract being awarded to Messrs. Douglas Bros. of Toronto, theirs being the lowest tender. The work has been satisfactorily done under the inspection of the Department.

Drains to carry off surface water from the main building have been laid under the Inspector of Asylums' Department.

CENTRAL PRISON, TORONTO.

Plans and specifications were prepared for forty-eight additional cells in the wings of the main building which have been erected, the work having been done in a very satisfactory manner by prison labor. Plans were also prepared for converting the the old hospital building, which has not been used for some years' into two dwellings for officials of the prison.

REFORMATORY FOR BOYS, PENETANGUISHENE.

General repairs to the buildings in connection with the institution have been attended to.

REFORMATORY FOR FEMALES TORONTO.

Ordinary repairs have been attended to by the Inspector of Prisons, etc.

DEAF AND DUMB INSTITUTE, BELLEVILLE.

Ordinary repairs have been attended to, and a hot water heater—purchased from the Polson Iron Works of Toronto has been put in place.

BLIND INSTITUTE, BRANTFORD.

This building being in good condition only a few minor repairs have been required.

AGRICULTURAL COLLEGE, GUELPH.

Plans and specifications were prepared for the rebuilding of the chemical laboratory, which was partially destroyed by fire on February 28th. Tenders were received and the contract awarded to the lowest tenderer, Mr. T. Matthews, of Guelph. This building, which was originally one storey high has been rebuilt two storeys in height, thereby giving required additional accommodation for classes, and much improving the building in every way. The laboratory is fully equipped, the ventilation being accomplished by means of the down draught system, worked by a fan and electric motor. The building is heated by steam, the work being satisfactorily done by the engineer of the College.

The ordinary and necessary repairs were made to the different buildings.

Considerable improvements have been made in the sewage disposal system, the wooden tanks having been removed and replaced by larger ones of cement, the tank house being enlarged for same. The filter beds, which were constructed in 1891, have also been raised and enlarged. The work has been satisfactorily completed under the directions of the Department.

Other works in connection with this institution have been carried out by the College authorities.

EDUCATION DEPARTMENT, NORMAL AND MODEL SCHOOLS,
TORONTO.

An additional storey has been erected to the Education Department to give the necessary and much-needed accommodation to relieve the over-crowded condition of the building. This structure was erected in 1852, and before it was de-

cided to build the additional storey the walls were carefully examined and found to be as sound as they were at the time of construction, and although they now have to sustain at least one-third more weight than before the addition was erected, not a visible crack or check has taken place since the new work has been added. The old roof was not removed until after the new one was put on, this being done in sections and accomplished without any damage being done to the building by water or otherwise. The work of the Department of Education proceeded throughout the whole of the operations without interruption other than the sounds of the trowel, hammer, etc. The additional storey has been designed in conformity with the general design of the building, and is laid out in a series of spacious apartments arranged en suite, connected with arched openings, the northeast and northwest apartments being designed for picture galleries, which are lighted from the north by means of large skylights in the roof—the light being reflected and uniformly diffused through mural glass in the ceiling and when completed it is safe the say that these will be the finest picture galleries in the Province. The other apartments will be used as art galleries. The contract for the work, excepting the steam heating and electric wiring, was awarded to Mr. John Damp, his being the most favorable tender. Work was commenced on the 17th of June and will be completed by the latter part of next month. The contract is being carried out in a satisfactory manner.

The heating work is being done by men in the employment of the Public Works Department under the superintendence of the Departmental plumber.

New floors are being laid in the corridors and also in some apartments in the old portion of the building.

Necessary repairs were made to the slating and galvanized iron work of the roofs of the Normal and Model School buildings.

NORMAL AND MODEL SCHOOLS, OTTAWA.

The usual and necessary repairs were made throughout the buildings, extensive repairs being made to the old portions of the roofs, including the slating and galvanized iron work, which have been thoroughly overhauled. Repairs have also been made to the steam heating, and some additional radiators placed in apartments which were insufficiently heated; also to the fences and planking of yards.

SCHOOL OF PRACTICAL SCIENCE, TORONTO.

Alterations have been made on the third floor of the north wing, some of the partitions being taken down and the apartments enlarged to give more room for classes. A lavatory has also been fitted up on this floor, the work having been done by men employed by the Department under the carpenter and plumber of the Department. Considerable painting and kalsomining has been done and general repairs have been attended to.

OSGOODE HALL, TORONTO.

A cottage for caretaker has been erected on the northwest angle of the grounds, the contract having been executed in a satisfactory manner by Mr. Henry Martin, of Toronto, his tender being the lowest. The building has been occupied for some time, and is heated by a hot air furnace, the work having been done by Messrs. Wheeler & Bain, of Toronto, to whom the contract was awarded, theirs being the lowest tender.

The necessary repairs were made to furniture, etc. The walls and ceilings to some of the apartments and corridors in west wing were painted and kalsomined and other repairs to the buildings have been made as required.

Additions, repairs, etc., have been made to the various gaols and lock-ups throughout the districts and furniture supplied as required, the annual inspection of those in the northwestern portion of the Province having been made in July by Mr. Kivas Tully, Consulting Architect and Engineer of the Department, the works attended to being as follows:—

ALGOMA DISTRICT

Repairs, painting, etc., have been made to the court house and gaol, Sault Ste. Marie, to the gaol at Manitowaning, and to the court house at Little Current.

THUNDER BAY DISTRICT.

The necessary repairs have been made to the gaols at Port Arthur and Fort William, fire extinguishers and hose having been supplied to the latter institution.

MUSKOKA DISTRICT.

Sundry repairs have been made to the Sheriff's office at Bracebridge, also to the lock-up at Burk's Falls.

PARRY SOUND DISTRICT.

The installation of electric lighting to court room, etc., has been made and sundry repairs attended to.

NIPISSING DISTRICT.

An addition has been built to the gaol and court house at North Bay to increase the number of cells and to give accommodation for the gaoler, the apartments formerly occupied by him being occupied as public offices. The contract has been satisfactorily performed by Mr. William Clarke of Toronto, his tender being the lowest. Furniture has also been supplied for the court room.

A kitchen has been fitted up in the basement of the gaol at Sudbury and slight repairs made thereto.

RAINY RIVER DISTRICT.

The outside of the gaol and court house at Rat Portage have been veneered with brick and necessary repairs made to the building; the instalment of the electric light has been completed.

GOVERNMENT HOUSE.

The necessary repairs have been made to the buildings as required, the outside wood and iron work of the main building, which had not had anything done to them for some time, were painted, as also the conservatory, the work having been let by contract after tenders had been duly received, to Mr. Wm. Elliott, his being the lowest. The usual amount of repairs have also been made to furniture, etc.

NEW PARLIAMENT BUILDINGS.

Ordinary repairs have been made and the building kept in good condition generally. The pump and apparatus for fire protection has been properly tested and found to work satisfactorily, and the heating and electric plant has been kept in good order. A granolithic walk has been laid from the main entrance to the crescent road south of the Macdonald monument, and a similarly constructed walk has been laid from the Speaker's entrance to the road immediately north of the buildings, the work having been properly done under contract by Messrs. Gardiner & Co., of Toronto. A fence of wrought iron tubing has also been erected along the boundary line of the Government property to the north of the buildings, being continued southerly on the east and west sides of the grounds as far as the driveway in front of the buildings to prevent persons from walking on the grass. A considerable amount of sodding has been done, and large flower beds placed in an artistic manner in suitable locations, and the grounds and roads have also been kept in good order generally. The statue of the Hon. George Brown has been removed from the rear of the buildings to its present position in front.

RONDEAU PARK.

A house for the Park Ranger, also a barn and stable, and a pavilion for the public have been erected at Rondeau Park, which is rapidly becoming a favorite summer resort; plans and specifications having been prepared for same and the work done in a satisfactory manner by men employed by the Department under a competent foreman.

I have the honor to remain, Sir,
Your obedient servant,

FRANK R. HEAKES,
Architect.

REPORT
OF
THE ENGINEER.

DEPARTMENT OF PUBLIC WORKS, ONTARIO,
Toronto, December 31st., 1896

HON. WM. HARTY,

Commissioner of Public Works, Ontario:—

SIR,—I have the honour to submit the following report on the construction and maintenance of Public Works, also respecting the extension of railways throughout the Province during the year 1896:—

GEORGIAN BAY IMPROVEMENT.

An appropriation of \$500 was granted last session for service on the improvement of what is known as the inner channel of the Georgian Bay, and the works which have been attended to are as follows:—

At the narrows, situated about two miles southerly from Parry Sound, two shoals of rock, which seriously interfered with navigation during low water, have been blasted and improved—one for a length of fifty feet and a width of eleven feet, and the other for a length of eight feet and a width of four feet, the average depth of excavation on both being about two feet, and a buoy has been placed above the narrows indicating the proper position of the channel.

At the seven mile narrows a strip of rock forty-five feet in length and three feet in width has been removed for a depth of eighteen inches, and the channel has also been improved by the removal of some loose stone from the northerly entrance.

In order to carry out the improvement it was necessary to utilize the Departmental diving apparatus in both places, the broken rock being raised by a derrick out of the water and deposited on a crib, upon which it was conveyed to favourable places and disposed of.

The work was commenced on the 9th of May and continued until the 30th of June, when it was completed.

MUSKOKA LAKES WORKS.

IMPROVEMENT OF WALLACE'S CUT.

As stated in my report for 1895 the improvement of this channel, which forms one of the outlets of Muskoka Lake into Bala Bay, was well advanced, when, owing to the severity of the weather, the work had to be suspended in the

latter part of November of that year. Operations were again resumed on the 1st of April of the present year, and continued until the 13th of May, when the improvement was completed.

The work consisted of the removal of the coffer-dam at the westerly end of the rock cutting and the blasting and removal of a point of rock; also the removal of a quantity of loose rock from the southerly side of the cutting, and the grading of the earth and trimming up of the bank to give the necessary side slope on the northerly side.

A bend in the channel at the westerly end of the rock cutting has also been improved by the removal 700 cubic yards of material, and a rock which endangered navigation at the easterly end has been blasted and removed and some additional dredging done in the recently excavated channel adjoining this end of the cutting.

An additional buoy has also been provided at each end of the new channel and three have been planted in Lake Muskoka, one on a shoal northeast of what is known as the "Lower Narrows" and the others on similar obstructions situated between Beaumaris and Port Carling.

JOSEPH RIVER IMPROVEMENT.

This river, which is the natural outlet of Lake Joseph into Lake Rosseau, has been improved during the present year so as to enable small steamers to navigate it, which formerly were unable to do so.

The work, which commenced on the 15th of May, consisted of the enlargement of the channel excavated through a shoal some years ago for the accommodation of small boats, and also the removal of a number of boulders from the bed of the stream at a point known as "Tuck's Narrows." The excavation consisted entirely of rock, which, after being blasted, was removed by a dredge, the work being continued until a channel twenty-five feet in width and four feet in depth had been provided, after which the removal of boulders was attended to, the whole being completed on the 8th of June. The carrying out of this improvement will not only benefit the settlers and lumbermen, by lessening the difficulty of driving saw-logs, etc., down the stream, but it is also likely to prove of considerable importance to parties owning small steamers on these waters, as by taking this route the distance which formerly had to be travelled in order to reach Port Cockburn and other points at the upper end of Lake Joseph will be lessened by about six miles.

Upon the completion of the work at Joseph River the dredge was taken to Port Carling, where some loose rock which interfered with navigation was removed from the channels both above and below the lock, after which the plant was taken to Gravenhurst and the machinery and two scows shipped to Huntsville for service on Peninsula Creek.

MAGNETAWAN WORKS.

In order to carry out the extensive improvements which have been made to these works during the present year, it was necessary to construct coffer-dams both above and below the lock, and of course close to navigation, but before doing so every possible preparation was made for the expeditious performance of the work, it being of considerable importance not only to parties interested in the different steamers on these waters, but to the general public as well that it be

carried out and completed with the least possible delay, and so complete were the arrangements made, that in less than three days from the time of closing, the lock chamber was successfully unwatered, which enabled the repairs to be at once proceeded with. Before the lock was closed the Navigation Company placed one of their steamers above and another below it, so that after operations were commenced, the daily trips were made as usual between Burk's Falls and Ah-Mie Harbour, the only inconvenience experienced being the trans-shipment of passengers and freight at Magnetawan while the work was in progress, which was from the 24th of July to the 8th of September.

The improvements and repairs which have been attended to are as follows:—

The entire sheeting has been removed from the lock-walls and the face of the timber cribwork hewn plumb; all open joints and seams in it being filled with pine wedges; and all loose and defective concrete has been removed from around the foundation timbers and replaced with new material. The walls have been re-sheeted with a double thickness of one and a half inch pine planking, the whole being well jointed and driven close with keys every six feet and securely fastened to the cribbing with four inch and seven inch ship spikes.

Upon the planking being removed from the mitre-sill platforms it was discovered that the upper sill had raised one inch from its proper position and the lower one four inches, and that the concrete filling was not in position to prevent leakage. This filling was therefore removed and the sills forced back into position and securely bolted, after which the spaces were refilled with concrete and again properly covered with new planking.

The concrete in the lock-walls in rear of the quoin posts was also found to be in a defective state and unfit to satisfactorily serve the intended purpose; consequently, it also was removed and replaced with proper material.

A large quantity of loose rock, which during time of freshet interfered somewhat with the flow of the water after passing the dam, has been removed from the westerly side of the lock-wall and a quantity of concrete has been placed alongside the foundation timbers on this side to prevent the water finding its way under the cribwork and creating leakage by affecting the concrete in the chamber.

The lock-walls have been provided with new stringers and the balance beam platforms have been rebuilt and enlarged, the whole being covered with three-inch planking, which is securely fastened with $\frac{3}{4}$ x 7 inch ship spikes and the lock-gates have been refitted to the mitre-sills and provided with new foot-walks, and the valves and rods overhauled and repaired where necessary, the gates also receiving two coats of paint.

As the leakage at the dams adjoining the lock had been considerable, a thorough examination was made while the basin above was dry, when, after the debris and gravel had been cleaned away to the foundation, it was ascertained that water had been escaping in several places through loose rocks and fissures which extended under the structure.

The loose rock was therefore removed and all voids filled with concrete and any open joints in the cribwork were also filled by inserting pine wedges and shingles, after which the entire face of the cribbing, including the sides of the openings as far back as the stop-log checks, was sheeted with $1\frac{1}{2}$ inch dressed and jointed planking and the entire structure well gravelled.

An old water-course situated about 100 yards northerly from the steamboat channel and which formed one of the outlets of Se-se-be Lake during time of

freshet, has been enlarged and improved for a length of 198 feet, a width of twenty-eight feet and to a depth of three feet; the materials removed in the carrying out of the work consisting of earth and a considerable quantity of solid and loose rock, also numerous stumps and pieces of floodwood.

The swing bridge situated a short distance from the lock has been provided with one new wheel for the turntable and the swinging gear otherwise repaired. Repairs have also been made to the suspension rods and a new piece of 12 x 15 inch timber sixteen feet in length provided at the toe of the structure.

Two buoys have been put down in the river indicating the position of rocky shoals, one being situated about 400 yards below the bridge and the other about half a mile further down the stream.

The dam at the outlet of Ah-Mic Lake has been supplied with two new stoplogs twenty-six feet in length each, and the pier at the easterly end twelve feet square, has been rebuilt a height of five feet with hemlock timber, and three pieces of half-inch chain with the necessary hooks and rings have been provided to enable the guide booms in the river above the dam to be better secured.

Peninsula Creek Canal.

An appropriation of \$2,500 was granted last session for expenditure on the improvement of this channel which connects Fairy and Peninsula Lakes.

Owing to the dredging plant being required on the Muskoka Lakes in the early part of the season and considerable repairs and fitting up having to be attended to after it was transported to this locality, the commencement of the work was delayed until the 8th of July.

Operations were commenced opposite the guide pier at the easterly or Peninsula Lake end of the canal, the dredging being continued until the 19th of October when the channel had been improved for a length of 2,100 feet and to a width of forty-five feet, a depth of eight feet at low water being provided.

Three of the cribwork piers constructed some years ago to prevent the earth from the banks from finding its way into the channel, have been taken down to the water's edge and rebuilt, and long hemlock ties twelve inches in diameter and extending from the cribwork into the bank where they are securely bolted to posts have been provided, to assist in resisting the pressure of the high bank along this portion of the canal, and at several points some additional stone filling has also been put into the cribwork.

A dry stone pier eighteen feet in length, four feet in width and seven feet in height has been constructed to support the end of the bridge across the canal, a new 8 x 12 inch sill, sixteen feet in length, being provided to receive the stringers; and the trestle bent adjoining the stone pier, also the one next the canal, have been supplied with new bottom and mud sills and several of the other bents have been straightened up and also provided with the latter.

The dry stone retaining wall at the northerly end of the bridge has been repaired and the roadway graded so as to carry the water away from the structure, and the beacons indicating the position of the channel at each end of the canal have also been repaired and repainted.

GULL AND BURNT RIVER WORKS.

The improvements attended to out of this appropriation during the present year consisted of the re-construction of three dams, which, owing to decay of the material of which they were formed, had become in a leaky and unsafe condition ; also the extension of the slide at the outlet of Hawk Lake, the details of the work done being as follows :

KENESIS LAKE DAM.

The dam at the outlet of this lake, situated in the township of Havelock, county of Haliburton, which was erected by the Department in 1877, has been rebuilt from low water up, and in order to increase the capacity of this valuable reservoir, the superficial area of which is about 3,490 square acres, the structure has been raised three feet in height which necessitated an extension of fifty feet in length and also an increase of the width in places.

The new dam is 208 feet in length, 18 feet in width and 10 feet in height above the slide flooring, the average total height being about 14 feet. It is provided with one stop-log opening 18 feet in width and a cribwork apron 75 feet in length and 12 feet in width, also a stop-log platform 34 feet in length and 12 feet in width, both apron and platform being covered with three-inch pine planking. The cribwork is constructed with 10 x 12 and 12 x 12 inch square hemlock, the timber being fastened together with $\frac{7}{8}$ inch iron drift bolts 22 inches in length, and the entire cribwork has been compactly filled with stone and the face of the structure well graveled to make it water-tight. The necessary stop-logs and windlasses and chains, etc., required for raising and lowering them have also been provided.

The timber required for the construction of the structure was obtained in the adjoining township of Sherborne, the entire material, with the exception of the planking, being made by employees of the Department.

BIG BEAR LAKE DAM.

This dam, situated in the township of Glamorgan, county of Haliburton, has also been rebuilt a height of six feet or from low-water up, and the slide has been extended a length of 20 feet. The dam is 80 feet in length and 11 feet in width with a slide opening formed in the cribwork 8 feet in width, the length of the slide being now 44 feet.

The dam is constructed with 10 x 12 and 12 x 12 inch pine and hemlock timber, the whole being fastened together with $\frac{7}{8}$ inch iron drift bolts and the cribwork filled with stone. It is provided with a stop-log platform 24 feet in length and 12 feet in width, the flooring being formed with 3 inch pine planking, fastened with $\frac{3}{8}$ x 7 inch pressed spikes, and is supplied with the necessary stop-logs and proper appliances for raising and lowering them as may be required.

The slide is constructed with bents placed 4 feet apart from centres. The floor sills, posts, braces and sides being of 10 x 12 inch hemlock timber, the whole fastened together with $\frac{7}{8}$ inch iron drift bolts and the flooring is of 4 x 12 inch birch secured to the sills with $\frac{1}{2}$ x 8 inch pressed spikes.

GRACE LAKE DAM.

The reconstruction of this dam, which is situated in the township of Monmouth, county of Haliburton, was commenced in the latter part of June and continued until the 31st July, when the work was completed.

It is 178 feet in length and 10 feet in width with three piers in same 10 feet in width, and 20 feet in length each, forming two stop-log openings 6 and 12 feet in width respectively, and is provided with a cribwork apron 63 feet in length and 20 feet in width and a stop-log platform 44 feet in length and 12 feet in width, both being floored with three inch planking.

The structure has been rebuilt from the water up, a height of six feet, the cribwork being formed with 10 x 12 and 12 x 12 inch pine and hemlock timber fastened together in the usual manner with $\frac{7}{8}$ inch iron drift bolts, the whole being compactly filled with stone.

The face of the dam has also been gravelled to make it water-tight, and the necessary appliances for handling the stop-logs have been supplied.

HAWK LAKE SLIDE.

In order to facilitate the passage of saw logs and timber down the tortuous rocky gorge which forms the outlet of this lake in the township of Stanhope, county of Haliburton, the slide has been extended 115 feet in length, the width being 12 feet in the clear. It is constructed with three longitudinal stringers of 12 x 12 inch square timber and framed bents of 10 x 12 hemlock, placed 5 feet apart from centres. The sides are also formed of 10 x 12 inch hemlock, except at points at which it was necessary, owing to the sinuosity of the channel, to put a bend in the structure, where birch, a timber better fitted to withstand the chafing of the logs when in transit through it, has been provided, and the flooring is also of birch 6 inches in thickness. The slide is braced every ten feet with round timber struts which are securely fastened to it and to the rock on each side.

The superstructure rests upon cribwork constructed of round timber, which is fastened together with iron drift bolts, the timbers in the balance of the work being secured in a similar manner.

In the carrying out of the improvement it was necessary to take down and rebuild 30 feet in length of the old slide in order to enable it to be properly connected with the new work, and several large boulders which formed obstructions in the stream below the foot of the new structure have been blasted and removed from the channel.

A coffer-dam was put in at the outlet of the lake and the bed of the stream unwatered in order to enable the cause of leakage, which was at times noticed as taking place, to be ascertained, when it was discovered that at some little distance above the dam the water found its way through some loose rocks into a crevice through which it forced itself and found an outlet below. These rocks were removed to a depth of about ten feet and the space which they occupied filled with gravel, and although the leakage has not been altogether stopped, it has been so greatly lessened that the quantity of water now escaping in this way is of no material consequence.

SCUGOG RIVER IMPROVEMENT.

An appropriation of \$3,000 was granted last session for service on the improvement of this stream in the town of Lindsay, and the work was commenced in the early part of August and continued until the 20th day of October.

It consisted of deepening and increasing the width of the channel between the lock and the Wellington street swing bridge, so as to enable the larger sized steamers in the locality to navigate this portion of the river during the seasons of low water, which at times they were formerly unable to do. The improvement will also render it less difficult to turn the steamers around and will greatly facilitate the handling of tugs having scows or rafts in tow, immediately before entering or after leaving the lock.

The material removed consisted principally of limestone rock, which after being blasted was raised from the bed of the river by a steam dredge and deposited on scows upon which it was taken to convenient points and disposed of. The excavation amounted to about 5,000 cubic yards of which 4,000 yards was rock and the balance earth and gravel.

In order to prevent the earth along the river bank from finding its way into the channel, a breastwall constructed of 10x12 inch hemlock timber has been provided for a length of 241 feet along the northerly side of the stream, 201 feet of which averages about 8 feet in height and the remainder 2 feet, the whole being solidly bolted and secured to the rock in such a manner as to prevent it being displaced by the pressure of the material behind, and the cribbing at the westerly end has been extended 30 feet in length and 7 feet in height, so as to connect it with the new breastwall.

The southerly side of the river has also been provided with two courses of 12x12 inch hemlock timber for a length of 130 feet, in order to protect the portion of the bank, immediately west of the town wharf, from injury by the water.

UNION CREEK IMPROVEMENT.

The improvements made to this creek during the present year have been as follows:—

A channel has been blasted through two shoals of rock situated in the township of Galway, one on lot 24 in concession A, and the other on lot No. 1 in the 10th concession, and a quantity of loose rock and boulders which interfered with the flow of the water have also been removed from the stream.

The removal of these obstructions will greatly facilitate the driving of saw-logs and timber, and as the bed of the creek has been lowered about twenty-two inches the carrying out of the work will also have a most beneficial effect on low-lying lands in the locality, of which there is a considerable quantity.

The balance of the work attended to consisted of the removal of fallen timber, sunken logs, brush and other debris from the stream, also the cutting away of sharp bends which interfered with the free passage of the water, improvements of this description being placed on lots 2, 3 and 4, in the 12th concession, and on the easterly branch from where it joins the main stream up to the road between the 12th and 13th concessions, also on the southerly branch, on lots 9 and 10, in the 9th concession.

The work was commenced on the 24th of September and completed on the 15th of October.

NATION RIVER.

A re-vote was taken last session of the appropriation of \$2,000.00 granted in 1895 to aid in the reconstruction of a bridge over this river at the village of Casselman, on condition that the additional amount necessary to carry out the work be provided by the village and the township of Cambridge, and the united counties of Prescott and Russell.

Upon the Department being notified in the early part of the present year that the work had been completed, examination was made, and as it was found satisfactorily carried out, a cheque for the amount of the appropriation was in due course forwarded to the treasurer of the united counties of Prescott and Russell.

The bridge consists of three pin connected trusses, constructed on what is known as the "Pratt" principle, the spans being 105 feet in length, each from centre to centre of end pins, and the clear width of roadway is sixteen feet.

The trusses and floor beams are constructed of steel, the floor joists being of 3 x 12 inch pine placed two feet apart from centres, and the flooring 3 inch planking, with 4 x 6 inch wheel guards provided at the sides.

The piers upon which the superstructure rests are constructed of coursed limestone masonry, the cut-waters, copings and bridge seats being dressed, and a chisel draft one and a half inches in width worked on each angle. The remaining portion of the work is left rock-faced, the whole being laid in Portland cement mortar and the joints neatly pointed, thus making a good substantial job.

This bridge was badly required and will prove a great convenience, not only to residents of the village in which it has been erected and the township of Cambridge, but also to many persons whose residences are situated in the townships of South Plantagenet and the northerly portion of Roxborough, whose nearest railway station is located on the westerly side of the river at this point.

MAINTENANCE LOCKS, DAMS AND BRIDGES, Etc.

The repairs and improvements which have been attended to out of this appropriation during the present year are as follows:—

DAM AND SLIDE AT NORLAND. GULL RIVER.

During the season of 1895 a drive of saw logs formed a jam in the river below this slide, the logs piling up in it to such an extent that the westerly side was broken away for a length of 83 feet, and some of the flooring and cross sills seriously damaged. This injury has been made good by rebuilding the side with 10 x 12 inch hemlock timber, the whole being fastened together with seven-eighth inch iron drift bolts twenty two inches in length. The slide has also been supplied with two new floor sills and two new stop-logs, and oak pieces have been put on the corners of the piers at the entrance to it to protect them from injury. The flooring of the damaged portion has also been renewed three feet in width, and the remainder repaired and refastened with $\frac{3}{4}$ inch iron drift bolts.

DAM AND SLIDE AT ELLIOTT'S FALLS, GULL RIVER.

The slide opening at the easterly end of this dam has been supplied with two new stop-logs and two stop-log posts, also two windlasses and frames, and the stop-log platform 34 feet in length and 12 feet in width has been re-floored with 3 inch hemlock planking, and the flooring of the slide opening repaired and fastened with $\frac{3}{4}$ inch drift bolts.

The waste sluice at the westerly end of the dam has been provided with new hardwood flooring 6 inches in thickness, also two new stop-log posts, four new stop-logs and one new windlass frame, and a course of 12" x 12" hemlock timber has been put on the westerly pier and the mill flume in the wing dam supplied with five new stop-logs.

DAM AND SLIDE AT WORKMAN'S MILLS.

These works, situated on the Gull River a short distance from the village of Minden were constructed during the winter of 1873 and 1874, but since then improvements have been required and attended to at different times until the entire structure has been renewed, the re-construction of the easterly portion of the dam and a considerable portion of the slide being attended to during the present year, the details of the work being done as follows:—

Three piers 20 feet in length and 10 feet in width each have been taken down and rebuilt 7 feet in height with 10" x 12" and 12" x 12" hemlock timber, which is fastened together with 2 $\frac{1}{4}$ inch rock elm treenails, except at the corners where $\frac{3}{4}$ " iron drift bolts have been used, the cribbing being compactly filled with stone.

The openings between the piers have been supplied with new posts and fourteen new stop-logs, also the necessary windlasses and chains, and a new platform 66 feet in length and 12 feet in width has been constructed, the flooring being formed with three inch pine planking, fastened to the stringers with $\frac{3}{8}$ " x 7" pressed spikes. In order to prevent the stop-log posts from being injured by logs when entering the slide, wedge shaped pieces of oak have been provided on the sides of the openings and the corners of the piers have been covered with similar material to protect them also from injury.

The slide which is 205 feet in length and which formerly had a uniform width of 20 feet has been altered for a length of 83 feet at the lower end, in which distance the descent is much more rapid than in the portion above. The alteration consisted of the reconstruction of this part in such a manner as to gradually decrease the bottom width to 12 feet at the extreme end, the sides being battered out to the full width at the top; the object in doing this being to contract the waterway so as to enable a sufficient depth to be maintained in the structure to float the logs clear of the flooring, which it was formerly impossible to do owing to the steep gradient.

The new work has been constructed with 12 x 12 inch cross-sills and 10 x 12 inch batter posts, placed at 5 feet centres, the batter posts being framed into the floor sills and securely bolted to the old crib work, which formerly served as the side of the slide; the framework being covered on the bottom and lower portion of the sides with six inch hardwood planking, and the remainder with four inch hemlock.

The bottom of the balance of the slide has also been rebuilt with similar new floor sills and planking, and the crib work on the northerly side has been extended for a length of 30 feet, and on the southerly side rebuilt for the same distance.

Horse Shoe Lake Dam.

The dam at the outlet of this lake has been supplied with two new windlasses and a portion of the flooring in the slide opening, which was worn out by logs passing over it, has been repaired with six inch maple planking.

Hall's Lake Dam and Glance Pier.

This dam has been supplied with two new stop-logs and the glance pier below has been provided with four new ties, two being six feet, and the others twenty and twenty-seven feet in length each respectively. The pier has been also repaired by rebuilding a portion thirty feet in length and four feet in height with hardwood timber, at a point where there is a bend in the structure.

Bass Lake Dam.

The eastern end of this dam has been rebuilt thirty-seven feet in length and three feet in height; and the sides of the slide opening have also been rebuilt and new flooring for it provided. The dam has also been supplied with a set of new stop-logs, and the necessary appliances for raising and lowering them; also a new stop-log platform, and the entire face of it 109 feet in length has been covered with two inch planking, with one inch lumber placed over the joints, the whole being well gravelled and made water-tight.

Otter and White Lake Dams.

The dams at the outlets of these two lakes have each been supplied with two new stop-logs and some gravelling has also been done at Otter Lake dam.

Nogie's Creek.

A dam and slide have been constructed on the main channel of this creek at the falls at the foot of what is known as the "Big Marsh."

The dam is forty-seven feet in length, ten feet in width and eleven feet in height, built of 10 x 12-inch hemlock timber and compactly filled with stone.

The slide, 106 feet in length and three feet six inches in width at the bottom with sides averaging about four feet in height and splaying outward eight inches to the foot, is constructed with three stringers of 10 x 12-inch timber, which supports framed bents placed at four feet centres; the bents being constructed with 8 x 10-inch sills and 5 x 6-inch posts and braces—the whole being of hemlock. The flooring is of birch four inches in thickness fastened with $\frac{1}{2}$ x 8-inch pressed spikes, and the sides are of 3 x 12-inch pine planking.

A pile dam twenty-five feet in length and five feet six inches in height, covered with three-inch hemlock planking on the face has also been constructed across the easterly channel and the dam across the westerly channel thirty-six feet in length and five feet six inches in height, which was formerly covered with poles, has been repaired with hemlock planking and gravelled to make it water-tight.

Mary's and Fairy Lakes Lock, Dam and Bridges.

The centre pier of the swing bridge across the canal at this lock, twenty-six feet in length and ten feet in width, has been rebuilt a height of three feet and the bridge has been adjusted.

The dam has been gravelled and supplied with two new windlasses and two new stop-logs, and the roadway bridge above has been repaired by putting twenty seven new planks in the flooring and tightening all bolts and truss rods in the structure.

Port Sandfield Swing Bridge, Etc.

Repairs have been made to the foundation timbers and swinging gear of this bridge, and the approaches sixty-six feet and twenty-eight feet in length each respectively, have been provided with new floors of three inch hemlock planking and new handrailings, the latter receiving two coats of fire-proof paint.

The lamps on the cribwork alongside the canal have also been repaired and steps provided to facilitate reaching them.

Muskoka Lake Dams.

The dam across the southerly outlet of the lake at Bala has been supplied with four new windlass frames, one new windlass and one new stop-log, and the stop-log platform has been repaired in several places.

The highway bridge, situated a short distance below this dam, has also been supplied with some new floor planking and other slight repairs made thereto.

The dam across the northerly outlet has been provided with two new stop-logs, one new windlass and two new platform stringers, and repairs have also been made to the windlass frames and flooring of the stop-log platform.

Port Curling Lock, Dam and Swing Bridge.

The balance beams of this lock have received two coats of white paint and the planking in the lock chamber has been repaired in several places and a new foot walk constructed on the lower gates.

The dam has been supplied with two new windlasses and the stop-log platform repaired, and repairs have also been made to the flooring of the swing bridge and to the end of the northerly approach thereto.

Pigeon River Dam and Slide, Etc.

These works, situated at what is known as the "High Falls" on this stream, in the Township of Pardee, were considerably damaged by ice during the spring freshet of the present year, necessitating the following repairs and improvements to be made :

The easterly and westerly piers above the dam have been rebuilt five feet in height, and the centre pier, which had been carried slightly out of its proper position, has been enlarged to 12 x. 20 feet square, or double the size it was originally constructed, and the three piers have been sheeted on the outside with two and three-inch pine planking, securely fastened with wrought spikes, and the cribwork compactly filled to the top with stone.

The face of the dam has also been sheeted with three-inch pine planking, and the entire structure gravelled and made water-tight.

A pier has been constructed on the westerly bank of the river at a point about thirty feet above the dam, where a considerable hole had been washed, to prevent further damage of this description being done by ice and water. The pier is twenty-seven feet in length, twelve feet in width and seven feet in height, the front being constructed of sawn pine timber and the back of round spruce, the crib-work being filled with stone and the top covered with three-inch pine planking which is securely fastened with seven-inch wrought spikes.

The slide has been extended fifty feet in length, the end being supported and also protected from injury by a pier constructed of round spruce timber. The pier is twenty-four feet in length, sixteen feet in width and an average height of seven feet, the crib-work being filled with stone.

The works were commenced in the early part of August and completed about the end of September.

Young's Point Lock and Swing Bridge, etc.

The gates of this lock have been provided with new quoin posts and the tops of them bracketted to prevent overflow during the seasons of high water, and repairs have also been made to the valves and appliances for working same.

The foot-walk on the upper gate has been re-constructed and on the lower one repaired, and the recesses of both gates have been cleaned out and some loose stone and sunken logs removed from the channels both above and below the lock, the work being done by a diver. The joints of the masonry in the lock-walls have also been re-filled and pointed up with Portland cement mortar and repairs have been made to the planking on the guide pier below the lock, and a new set of stop-logs provided for the head of the canal above.

The swing bridge has been supplied with one wheel, also a new timber circle and a concrete and stone foundation for the turntable, and masonry retaining walls have been constructed at the ends of the bridge to replace the old timber ones which were in a decayed and unsatisfactory condition.

During the carrying out of the improvements to the swing bridge, a temporary structure was provided over the lock, so that the public were not inconvenienced in any way while the work was being attended to.

Lindsay Lock and Swing Bridges, etc.

In order to stop leakage a new pier thirty-four feet in length, ten feet in width and ten feet in height has been constructed alongside the southerly wall of this lock, and adjoining the westerly end of the dam. The pier is constructed of 10 x 12 inch hemlock timber, and a concrete wall five feet in height and two feet in thickness has been provided inside for the purpose of making the lower portion watertight, the balance of the space being filled with stone and the whole covered with three inch hemlock planking.

A new guide boom, 183 feet in length and three feet in width has also been provided and placed above the lock, and a pier built to support it. The boom is constructed of three pieces of 10 x 12 inch pine timber, securely fastened together with 7-8 inch bolts and oak keys, the bolts being placed about eight feet apart from centres.

The pier is twelve feet in length, six feet in width and seven feet in height, constructed of 10 x 10 inch cedar, the whole being fastened together with 3-4 inch drift bolts and compactly filled with stone.

The recesses of the lock have been cleared of debris which interfered with the proper working of the gates, and repairs have been made to the foundation timbers above the upper mitre sill, the work being done by a diver.

The swing bridge at the lock has been supplied with one new wheel for the turntable and some other minor repairs attended to, and the flooring of the Wellington street bridge has been renewed with three inch hemlock planking.

The swing bridge south of Lindsay has also been supplied with a new wheel and repairs have been made to the centre pier and approaches at each end of the structure.

Balsam River Lock, Dam and Swing Bridge.

The only portion of these works requiring attention during the present year was the swing bridge which has been provided with new end timbers, but considerable repairs will require to be made to the dam and new quoin posts provided for the lock during the coming year.

The following are the different Lockmasters' returns of lockages made during the present year:—

1. Magnetawan Lock—491 steamers, 49 small boats, 130 scows and 32 rafts or cribs of timber.
2. Mary's and Fairy Lakes Lock—177 steamers, 70 small boats and 32 scows.
3. Port Carling Lock—2,110 steamers, 1,400 small boats, 711 scows, 244 rafts or cribs of timber.
4. Balsam River Lock—Twelve steamers, 180 small boats, 51 scows, 7 rafts or cribs of timber and 160,500 logs.
5. Young's Point Lock—981 steamers, 54 small boats, 86 scows and 78 rafts or cribs of timber.
6. Lindsay Lock—107 steamers, 47 small boats, 220 scows and 214 rafts or cribs of timber.

EXTENSION OF RAILWAYS IN 1896.

The following are as far as could be ascertained the details of the work done during the present year on the different lines of railway under construction :

Ottawa, Arnprior and Parry Sound Railway.

The construction of this railway has been so vigorously prosecuted during the present year that the portion remaining unfinished at the close of 1895 between Cache Lake and the crossing of the Northern Division of the Grand Trunk Railway at Scotia, a distance of 47½ miles was completed in the early part of December. From Scotia westward the line was formerly known as the Parry Sound Colonization Railway which, as previously reported, was completed to the inner channel of the Georgian Bay at the close of last year, so that the entire line from Ottawa to the water of Parry Sound, is now open for traffic.

Construction work has also been in progress on the extension of the line across Parry Island to the terminus at Depot Bay, a distance of about 3 $\frac{1}{2}$ miles, and I understand the work is well advanced and will be completed in the early part of the coming year.

In addition to the work referred to as having been attended to during the present year on new portions of the line, the company has also considerably improved portions previously reported upon, by replacing wood trestle structures with substantial embankments; and at Madawaska, in the Township of Murchison, which it is proposed to make a divisional point, a five stall brick engine shed and a commodious frame station building and a refreshment room has been erected, also a building intended to be used as a temperance hotel, and a turn-table and 60,000 gallon water tank has been provided, and eight sidings laid, having a total length of about two miles.

Irondale, Bancroft and Ottawa Railway.

The construction of this railway has been continued during the present year the line being completed and opened for traffic in the early part of August, to Baptiste Lake in the Township of Herschell, a distance of 45 miles easterly from the junction with the Haliburton branch of the Grand Trunk Railway.

The work has since been continued and I understand an additional mile has been graded and the rails laid and ballasting attended to for three-quarters of a mile, the end of the track now being about eight miles from the village of Bancroft.

Ontario, Belmont and Northern Railway.

The construction of this railway was, I understand commenced in 1892 and continued in the spring of 1893, until a considerable amount of grading had been done, when the work was suspended.

Operations were again resumed in June of the present year and continued until the early part of September, when the line was completed. It commences at a point on the Central Ontario Railway about two miles northerly from where the Canadian Pacific crosses that line and extends in a north-westerly direction across the Township of Marmora, and to lot 19 in the 1st concession of the Township of Belmont, where I understand valuable mines are situated, the total length being 9 $\frac{3}{4}$ miles. The line has, I am informed, been opened for traffic and is being operated as a portion of the Central Ontario Railway.

The following revised statement to the close of 1896 gives in detail the mileage of each railway in Ontario distinguishing between those constructed prior to and since Confederation :

PARLIAMENT BUILDINGS, TORONTO, 12th November, 1896.

To the Honourable COLONEL GIBSON, Q.C., M.P.P., &c.,

Commissioner of Crown Lands,

Toronto.

SIR,—I have the honor to submit the accompanying reports respecting the various organizations authorized to undertake contracts of insurance, indemnity or guarantee, in the Province of Ontario. Of these organizations the Act of 1892 (55 Vict., chap. 39), as amended by the Act of 1893, (56 Vict., chap. 32), distinguishes three great Divisions :

A. Registered Dominion Licensees : being Insurance Corporations, Companies, or Underwriters, operating under the Insurance Act of Canada and registered by the Province of Ontario, for the transaction of insurance in the Province.

B. Provincial Licensees : being Insurance Companies licensed, inspected and registered by the Province of Ontario, for the transaction of insurance therein.

C. Registered Friendly Societies : being Societies registered by the Province of Ontario, for the transaction of insurance therein.

Of these Divisions the Companies comprised in Division B (Provincial Licensees) are alone inspected by the Province, and are here reported on in the usual form and with the usual financial details pursuant to the provisions of the Ontario Insurance Act.

The report upon Division A (Dominion Licensees), made on the 26th January, 1893, described fully their mode and place of incorporation ; their statutory powers, duties, rights and obligations ; their internal organization ; the relation of the members *inter se* ; the liabilities of the members to the creditors of the Company ; the kind or kinds of insurance for which the Company is registered in Ontario ; and the extent to which assets of the Company have been deposited in various countries as special security for the policy holders of those several countries. In the present report, except in cases of new licenses, it has not been considered necessary to set out all of these details. Where any change has occurred in the Company's powers or status the nature and extent of such changes are indicated.

All of the Companies in Division A, except Ocean Marine Companies, make financial statements annually to the Dominion of Canada ; and those statements as revised by the Dominion Superintendent, can be found in the Superintendent's Annual Report. The balance sheets therefore printed here, under Division A, are limited to those of Ocean-Marine Companies.

The report upon Division C (Friendly Societies), made on the 26th of January, 1893, related to their mode and place of incorporation ; the statutes and instruments under which the Societies were constituted, and those by which they are now governed ; the kind of insurance or insurance benefits undertaken ; that report also showed *inter alia*, whether or not the certificate holders generally are secured by a reserve fund ; and, if a reserve fund is maintained, whether any of this reserve is held in Ontario, any, how much, how invested, and by whom held and controlled.

[5]

The present report on Division C consists of abstracts of the Annual Statement for the year ending 31st December, 1895 made by the Friendly Societies to the Insurance Department of Ontario, under section 47 of the Insurance Corporations Act.

In order to prevent unnecessary delay in publication, the three Divisions have been placed simultaneously in the printer's hands—the pages of the several Divisions being distinguished by the Division letter prefixed. Division indexes have been inserted at the end of the volume. These indexes show the Companies and Societies standing registered at dates therein mentioned.

Besides requiring all bodies undertaking insurance to be registered, the Act requires registration of the individual agents of Life and Accident Insurance Companies. The concluding index shows in alphabetical order the names of all such agents standing registered at the date specified therein.

I have the honor to be,

Sir,

Your obedient servant,

J. HOWARD HUNTER,

Inspector of Insurance and

Registrar of Friendly Societies.

DIVISION A.

REGISTERED DOMINION LICENSEES: BEING INSURANCE CORPORATIONS, COMPANIES OR UNDERWRITERS OPERATING UNDER THE INSURANCE ACT OF CANADA, AND REGISTERED BY THE PROVINCE OF ONTARIO FOR THE TRANSACTION OF INSURANCE IN THE PROVINCE.

DIVISION A.—REGISTERED DOMINION LICENSEES, BEING INSURANCE CORPORATIONS, COMPANIES OR UNDERWRITERS OPERATING UNDER THE INSURANCE ACT OF CANADA AND REGISTERED BY THE PROVINCE OF ONTARIO FOR THE TRANSACTION OF INSURANCE IN THE PROVINCE.

NOTE.—The report upon Division A (Dominion Licensees), made on the 26th January, 1893, described fully their mode and place of incorporation; their statutory powers, duties, rights and obligations; their internal organization; the relation of the members *inter se*; the liabilities of the members to creditors of the Company; the kind or kinds of insurance for which the Company is registered in Ontario; and the extent to which assets of the Company have been deposited in various countries as special security for the policy holders of those several countries. In the present report, except in the case of new licensees, it has not been considered necessary to set out all of these details. Where any change has occurred in the Company's powers or status, the nature and extent of such change are indicated.

All of the Companies in Division A, except Ocean-Marine Companies, make financial statements annually to the Dominion of Canada; and those statements as revised by the Dominion Superintendent can be found in the Superintendent's Annual Report. The balance sheets therefore printed here under Division A are limited to those of Ocean-Marine Companies.

The deposits of Companies in this Division have been received up to 15th October, 1896.

THE GUARDIAN FIRE AND LIFE ASSURANCE COMPANY (LIMITED)
OF LONDON, ENGLAND.

Register No. 727.

Certificate of Registry No. 419.

1. Head Office, London, England. Chief Agent and Attorney for Ontario, Henry D. P. Armstrong, Toronto. Suits by or against the Company may be brought in the name of the Company, which (as mentioned below) became on the 25th May, 1893, incorporated as a Company limited by shares.

2. *The legislative enactments* by which the powers, duties, rights and obligations of the Company are now declared, defined or governed are the following: United Kingdom, 13 and 14 Vict., 1850, chap. 25, an Act for the better enabling The Guardian Fire and Life Assurance Company to sue and be sued, and to alter certain provisions of their Deed of Settlement, and to give other powers to the Company; 29 and 30 Vict., 1866, chap. 225, an Act to enable The Guardian Fire and Life Assurance Company to reduce the amount of their paid up subscription capital stock, and to alter certain provisions of their Deed of Settlement and to amend The Guardian Assurance Company's Act, 1850, and to give further powers to the Company and Directors thereof; 33 and 3 Vict., 1870 chap. 61. The Life Assurance Companies' Act, and The Guardian Assurance Company's Act, 1893. More particularly referred to below.

3. *The members, prior to the 25th of May, 1893, were related* as shareholders in an unincorporated joint stock company, and the liability of the members was unlimited except so far as their liability was limited by the 51st article of the Deeds of Settlement, which required that all policies and instruments of assurance to be granted by the Company should contain a proviso limiting the liability of the shareholders in the Company, to the amount of their respective shares in the capital stock and funds of the Company, and by the 109th article of the same deed which required that all deeds and contracts entered into by the Directors and other officers of the Company should contain a like proviso, and by the proviso to the effect aforesaid, which by the practice of the Company was actually inserted in all the policies of assurance issued by the Company. The Company was advised that by the laws of the United Kingdom the effect of the said articles and proviso when so inserted was to restrict the liability of the shareholders to the amount remaining unpaid upon the shares held by them, so far as regarded their liability to the persons assured by or claiming under any such policy, instrument, deed or contract containing such proviso.

By the Guardian Assurance Company's Act, 1893, (Imp.) which received the Royal Assent April 29th. 1893, the Company was empowered to register under the Companies' Act. 1862 to 1890 as a limited liability Company, and this was done on the 25th of May, 1893. Section 9 of the Act of 1893 provides: "Nothing in this Act shall operate to prejudice or effect the rights of the existing policy holders of the Company." SUPREME COURT OF THE INDEPENDENT ORDER OF FORESTERS.

Register No. 745.

Certificate of Registry No. 438.

The status of this society is now defined by the following recent Acts: 59 Vic. (Ont.) chap. 120, an Act respecting the Supreme Court of the Independent Order of Foresters; 59 Vic. (Can.) chap. 51, an Act to amend the Act incorporating the Supreme Court of the Independent Order of Foresters.

By virtue of this legislation and of R. S. C., chap. 124, the society made a deposit of \$100,000 with the Government of Canada, and was by that Government on 1st May, 1896, licensed for the transaction of Life, Disability and Sickness Insurance with its members on the assessment plan to the extent specified in the Act of Canada of 1896, amending the Act incorporating the said Supreme Court. The legal effect of the foregoing was to alter the registry of the society in the Department of Insurance for Ontario and transfer, as from the 1st May, 1896, the society from the Friendly Society to the Insurance License Register.

For statement of the society's affairs for the year ending 31st December, 1895, see under Division C.

GRAND COUNCIL OF THE CATHOLIC MUTUAL BENEFIT ASSOCIATION OF CANADA.

This society was transferred from the Friendly Society to the Insurance License Register from the 25th April, 1896, and is now authorized under section 38 of chapter 124 (Can.) to transact Life Insurance on the Assessment Plan.

For statement of the society's affairs for the year ending 31st December, 1895, see under Division C.

 PROVINCIAL PROVIDENT INSTITUTION.

Note.—By instrument bearing date 27th June, 1896, the Provincial Provident Institution entered into an agreement to amalgamate with Mutual Reserve Fund Life Association, and a copy of the instrument is printed below. The Provincial Provident Institution had up to 31st day of August, 1896, been authorized by registration of the Dominion Government, under section 33 of the Revised Statutes of Canada, chapter 124, to transact life insurance on the assessment plan; but on the 31st day of August, 1896, the said registration was suspended by order of the Governor-General in Council, and public notice was given of the same in the "Canada Gazette." This suspension operated *ipso facto* to suspend the registry in Department of Insurance for Ontario as from the date of the said Order in Council. (55 Vic. c. 39, s. 49.)

J. H. H.

 COPY OF AGREEMENT ABOVE REFERRED TO.

This Agreement, made this 27th day of June, in the year one thousand eight hundred and ninety-six, by and between the Provincial Provident Institution, a corporation duly organized and existing under and by virtue of the laws of the Province of Ontario, of the first part, and the Mutual Reserve Fund Life Association, a corporation duly organized and existing under and by virtue of the laws of the State of New York, of the second part, witnesseth:

Whereas, the parties hereto are engaged in the business of life insurance on the assessment or co-operative plan, and

Whereas, the party of the first part is desirous of amalgamating with the party of the second part, and of transferring its members to the said party of the second part;

Now, therefore, for and in consideration of the premises and of the covenants and stipulations hereinafter contained, and of the sum of one dollar, lawful money, in hand paid by the said party of the first part, the receipt of which, before the signing of these presents, is hereby acknowledged by the said party of the second part, this agreement witnesseth as follows:

First. That the said party of the first part shall on the 15th day of July, 1896, as the agent of the party of the second part, issue to its members a notice of an assessment in accordance with the terms of the certificate of membership held by each of the members of said party of the first part, which said assessment shall be known as the "transferring assessment," which said notice shall contain a statement embodying the substance of this agreement, and shall be prepared by the party of the second part, and be approved by a committee of trustees of the party of the first part;

Second. That the said party of the second part shall assume all the outstanding risks of the party of the first part, and shall become responsible for all losses and claims accruing to members or policy-holders of the said party of the first part from and after the date of the notice of the transferring assessment, as provided in the first clause hereof, the amount of which assessment, together with eight dollars per one thousand of business actually paying said transferring assessment as a first payment or admission fee, and two dollars per one thousand of business so paying said assessment on account of the general expense fund, shall be paid to the party of the second part;

Third. The payment of the transferring assessment by any member of the party of the first part, in accordance with said notice and the terms and conditions thereof, shall constitute such member a member of the party of the second part, with all the rights and privileges of such, and subject to all the obligations of such membership in the party of the second part, including the provisions of the constitution or by-laws and the rules and regulations of the said party of the second part as they now exist or as the same may be hereafter amended. The members of the party of the first part so becoming members of the party of the second part shall not be called upon to pay assessments in excess of those charged members of the party of the second part entering said party of the second part at the same dates and ages as said members so transferred from the party of the first part entered said party of the first part respectively, except as by change of policies or certificates of membership this agreement may be modified ;

Fourth. That members of the party of the first part so becoming members of the party of the second part shall not be required to exchange their policies or certificates of membership for those of said party of the second part unless they may elect so to do ; their insurance will be continued under the policies or certificates issued by said party of the first part as hereinbefore provided, subject to the terms thereof as to forfeiture for non-payment of dues and assessments.

Fifth. That said party of the first part shall pay all claims to policy-holders or otherwise outstanding or incurred up to the date of said transferring assessment, and shall immediately on the issuing of the notice of said transferring assessment pay over to said party of the second part the fund known as the Annuity Fund of said party of the first part, and upon the completion of said transferring assessment ten dollars per one thousand of all transferred business where the attained age of the member at the time of such transfer exceeds sixty years ;

Sixth. All papers, notices, assessment circulars, and all other documents or papers whatever to be sent out to carry into effect the provisions of this agreement, shall be prepared by the party of the second part and approved by a committee of the trustees of the party of the first part ;

Seventh. It is covenanted by the party of the first part that it, its officers and trustees shall aid and will give its and their utmost moral aid in aiding the transfer of its membership to said party of the second part, the exchange of policies or certificates of membership to those issued by the party of the second part and the complete performance of all the conditions and provisions of this agreement ;

Eighth. That all moneys received by the party of the second part on account of the business transferred or from member of the party of the first part shall be used and applied by the said party of the second part to the same uses and purposes as moneys received from new members of said party of the second part admitted at the date of such transfer ;

Ninth. That if any member or members of the party of the first part declare his or their unwillingness to assent to the transfer of membership herein provided and insist on remaining members of the party of the first part, said party of the second part hereby covenants and agrees that, in consideration of the payment to it of said member's or members' dues and assessments by the said party of the first part, to re-insure the risk on such member or members until he or they can be seen and a personal adjustment made with such member or members, and the party of the second part agrees to protect said party of the first part against all expense involved in such adjustment ;

Tenth. That the said party of the first part shall immediately on the day of the date of the said transferring assessment turn over to said party of the second part all original applications for membership heretofore at any time received by it, and any and all books, records, accounts, documents and vouchers in any way relating to any policy or certificate of membership outstanding on the day of the date of the notice of said transferring assessment.

In Witness Whereof, the parties hereto have caused their Corporate Seals to be hereunto affixed and these presents to be signed, on the part of the party of the first part by its President and Secretary and on the part of the party of the second part by its third Vice-President in duplicate, the day, month and year first above written.

I.—MAJORITY REPORT OF THE COMMITTEE ON THE CONDITION OF THE ORDER.

ORDER OF CANADIAN HOME CIRCLES.

11th Annual Session of the Supreme Circle.

To the Supreme Leader, Officers and Members of the Supreme Circle :

Your Committee was appointed at the last Annual Meeting of the Supreme Circle, under a resolution to be found at page 102 of the Journal of Proceedings, as follows :—

“ That a Committee be appointed by the Supreme Circle to inquire into the condition of the Order. And they shall have power to call in a duly qualified actuary to consider the rates charged to members of the Order, and the division of said members into classes, and the rates charged the different classes, and the continuation, diminution and increase or discontinuance of the reserve fund, and upon his advice and with the written approval of the Registrar of Insurance for the Province of Ontario, report in respect thereto to the Supreme Circle, at its next meeting with such amendments to the Constitution and Laws as are necessary to the carrying out of their report, always bearing in mind that the object of the Order is to furnish insurance to the members at the actual cost, and providing for the due safe-guarding and stability of this Order, and the insurance of the members thereof and benefits promised to them by their Certificates.

The Report of this Committee, after such approval by the Registrar of Insurance for the Province of Ontario, shall be printed in the *Leader*, and distributed to each member of the Order on or before the 1st day of November, 1896, and such amendments to the Constitution and Laws shall come up for approval, and shall, if approved of by the Supreme Circle at their next meeting, immediately become law.”

In pursuance of this resolution, a meeting of your Committee was held on the 18th day of April, 1896, when it was determined that, as no member of the Committee was an authority on Actuarial figures, we should require the services of a competent actuary.

Another meeting was held on the 5th day of June, 1896, to reconsider the matter of employing an actuary, in view of the fact, that the employment of an actuary would entail a large expenditure out of our general fund, and also in view of the fact, that it had transpired since our last meeting, that the Ancient Order of United Workmen were then making inquiry, as to the sufficiency of their assessments, and generally on the same lines as your Committee were empowered to act, and had employed a very able actuary for their purposes, and that the result of their inquiries on these lines, would be made known in June or July of this year, [1896].

Your Committee then concluded to await the result of the inquiry of the Ancient Order of United Workmen, and in the meantime do nothing more towards employing an Actuary, except to find out what would be the probable cost.

The members of the Committee having each been making inquiries and seeking information on the points submitted to them, thought they had collected material enough to justify the calling of another meeting, accordingly called a meeting for the 5th day of September, 1896, but owing to the unavoidable absence of two members of the Committee, on that day, nothing was done.

Another meeting was called on the 24th day of September, 1896, and all the members not being present nothing was done.

Another meeting was then called for the 1st day of October, 1896, when all the members of the Committee were present, and the material collected by each member of the Committee was brought before the Committee, and discussed, but no result was then arrived at and the meeting was consequently adjourned until the 15th day of October, with the understanding that the Committee should then sit until its report should be completed.

Pursuant to the adjournment, your Committee met again, on the 15th day of October and concluded its report as follows :

The primary object of your Committee has been to consider the rates charged to the different classes, and in considering this question, without burthening our report, with all the material and assistance we had before us, we had several actuarial reports, of the highest authority in England, Canada and the United States on friendly societies similar to our own, and the rates charged by other friendly societies in Ontario.

We find as a principle, applicable to our Order, that the stability and perpetuity of the Order depends chiefly upon two things, one is the lowest rates consistent with the stability of the Order and the other is a constant accession of young members, and keeping the accession of older members within due limits, in order to maintain the average minimum age of the whole membership of the Order, and unless we keep up the average minimum age by such constant accession of young members we shall be obliged to adopt a table of assessments, which would practically prohibit the older members from joining our Order.

This being the case, we have considered the different rates of assessment of members of our Order, and in considering this question, we find there is only one other friendly society in Ontario, with lower rates than our own, but we give greater benefits than the last mentioned Order, and on the other hand, they have not less than twelve assessments in the year.

We also note that in all the other friendly societies in Ontario, and more notably in England, the rates from the ages of 35 to 50, are much higher than our own.

We also note that in all the actuarial reports before us, that the rates at those ages are much higher than the rates actually charged by all friendly societies.

We think it inadvisable at present, to make any change in the rates of our assessments, as they now stand up to and including the age of 35.

After the age of 35, we do not think the assessments as they now stand in our Order, are high enough in proportion to those paid by members under that age.

We would therefore recommend that the following table should be adopted instead of that now contained in Law 1, Sec. 2.

	Rate \$50.	$\frac{1}{3}$ Rate \$1,000.	$\frac{2}{3}$ Rate \$2,000.	Full \$3,000.
Class A, from 18th to 25th birthday	\$ 25	\$ 50	\$1.00	\$1.50
Class B, from 25th to 30th birthday28	55	1.10	1.65
Class C, from 30th to 35th birthday30	60	1.20	1.80
Class D, from 35th to 40th birthday40	80	1.60	2.40
Class E, from 40th to 45th birthday55	1.10	2.20	3.30
Class F, from 45th to 50th birthday75	1.50	3.00	4.50

We are of the opinion that the present members who entered the Order over the age of 35, have not been paying a rate as high in proportion as the members who entered under that age.

We therefore recommend, that if the above table be adopted, all members *who have already entered the Order, at an age over 35, and all who shall hereafter enter the Order, over the age of 35*, shall pay assessments at the above rates, present members to be charged according to age as date of admission to the order.

As to those members now in the Order, who joined between 50 and 60 years of age, we recommend that they shall be assessed after the next Supreme Meeting at the following rates.

	\$1,000.	\$2,000.	\$3,000.
Those who joined between 50 and 55	2 00	4 00	6 00
Those who joined between 55 and 60.....	2 60	5 20	7 80

In carrying out the views above set forth, we cannot impress too strongly upon all members and organizers, the necessity of seeking to obtain as many young members as possible, and while by no means wishing to reject applicants over the age of 35, yet the younger applicants should be most sought after.

We do not recommend for the present, any change in the scheme of the Life Expectancy Reserve Fund, already adopted by the Supreme Circle.

In making the above recommendation, we have not ignored any of the objections, which have been urged, that our assessments are too low for safe insurance, and we have kept fully in view the due safe guarding and stability of the Order and the insurance to members thereof the benefits promised them by their certificates.

In view of the material and information upon friendly societies and life insurance we have had before us, and in view of the large expense incidental to obtaining an actuarial report, we thought we were justified in dispensing with the employment of an actuary.

In the recommendations above made we have also kept in view the fact, that in order to obtain new members, we must keep down our assessments to the lowest point consistent with the stability and perpetuity of our order, and so that our low assessments will be sufficient to meet death claims, and at the same time be an inducement to new members to join the order in preference to other societies, because, granting the stability of our order we are satisfied that the low rate of assessment is the leading inducement for young members to join, and so long as we can keep up the accession of young members, so as to keep down the average minimum age limit, we can be assured of our stability and perpetuity.

In order to increase our general fund, and thus give more aid to our organizing work and to secure an equitable arrangement for the amount of insurance carried, we recommend that the per capita tax of the \$1,000 members shall remain as at present and the \$500 member to pay 84c. a year, and the \$2,000 members to pay \$1.80 per year, and the \$3,000 members to pay \$2.40 per year, in monthly payments.

We recommend that the constitution be amended to provide for the organizing department being under the control of a committee composed of the Supreme Leader, Supreme Organizer, Supreme Secretary and Supreme Vice-Leader, and such other supreme officers as may be decided upon, and that the work of increasing the membership of the order be pushed with greater energy and that provision be made for a visit of each circle once each year by some one of the supreme officers.

All of which is respectfully submitted.

Dated at Toronto this 15th day of October, A.D. 1896.

II.—FINDING OF REGISTRAR OF FRIENDLY SOCIETIES UPON ABOVE MAJORITY REPORT.

DEPARTMENT OF INSURANCE FOR ONTARIO, TORONTO, 26th October, 1896.

Re ORDER OF CANADIAN HOME CIRCLES.

AMENDMENTS TO PREMIUM RATES.

I have considered the annexed Report of the Committee appointed to inquire into the condition of the Order of Canadian Home Circles, and have compared the tables of premium-rates existing and proposed.

It is perfectly clear that the existing premium rates are entirely insufficient to provide for the life insurance certificates already in force, and still being issued. The present rates purport to be *level* premium rates for an ordinary all-life assurance; that is, the rate of assessment on each policy holder (subject to half conversion into endowment presently to be noticed) is fixed for his life on the basis of his age at entrance. The table of assessment rates is not graded by single years, but by groups of years, the rates being as follows:

(Const. and Laws, 1895, p. 24):

	Rate per \$1,000.
Class A, from 18th to 25th birthday	\$0 50
“ B “ 25th to 30th “	55
“ C “ 30th to 35th “	60
“ D “ 35th to 40th “	67
“ E “ 40th to 45th “	85
“ F “ 45th to 50th “	1 00

Formerly two additional classes existed as follows:—

Class G, from 50th to 55th birthday	\$1 00
“ H “ 55th to 60th “	1 25

and the certificate holders formerly admitted to these classes continue to pay assessments at these rates.

In order to place in a clear light the insufficiency of the premiums, both existing and proposed, I have, in the appended table, placed them in parallel columns with the net level annual premium Actuaries' 4% Table, nothing being added to the net premium for expenses of management, or any other expense whatsoever; and this net level annual premium is in the table divided into its two components, viz, the reserve element, and the mortality element. The mortality element in the level premium is otherwise known as the “natural premium,” and represents the sum absolutely necessary to insure the life for one year, without any allowance for expense. The whole of this mortality element is exhausted in carrying the life at that age through one year of insurance. The reserve element (which is not to be confounded with surplus) is that portion of the level premium which, with its accumulation, will be absolutely required hereafter to relieve the policyholder from paying a premium yearly increasing with his age. Thus from the appended table it will be seen that the net natural premium for one year's insurance is, at 18 years of age, \$6 86; at 19 years of age, \$6 98; and that the natural premium increases year by year for each year of insurance until, when the policy holder who entered at 18 has

reached 60 he would pay for that single year's insurance \$29 17. Instead of thus paying an annually increasing premium he more easily pays an equalized or, as it is termed, "level" premium, the net level premium at 18 being, for \$1,000 insurance, \$12 35, which, in that year is made up of the mortality element or natural premium \$8 86, and the reserve \$3 49. In his next year he again pays \$12 35, which is now made up of an increased mortality element and diminished reserve element, and so year by year. In any level premium system, therefore, the reserve element of the premium is as absolutely necessary as the mortality element, so that if this reserve element is not provided, then the proper alternative is to make each policy holder pay an annually increasing premium consisting of the mortality element and an addition or loading for expenses of management.

The "Actuaries'" or "Combined Experience" table is here used for purposes of comparison. But calculations based on any other of the standard mortality tables used by life insurance companies would practically give the same results. If friendly society experience were substituted for the experience of life insurance companies, the comparison would be still more unfavorable to the Home Circles Society, as will be seen by referring to Mr. Neison's table, printed at page C. 206 of the Ontario Insurance Report for the year ending December 31, 1894.

In the Actuaries' table the assumption is that the net level annual premium is paid in one sum at the beginning of the year; and for purposes of placing the Home Circles Society on an equal footing I shall assume for the present that the amount of twelve assessments is paid at the beginning of each year. The Actuaries' level premium shown in the appended table is for an ordinary all-life insurance policy of \$1,000 maturing at death, and not entitling the policy holder to any endowment. I shall also assume for the present that the Home Circles' certificate is for the same insurance without endowment. Upon now referring to the appended table, it will be seen that the Home Circles Society has been actually attempting to carry its members during their whole lives for a level premium in most cases less than the mere mortality element, or natural premium proper to the particular year when the member first entered the Society. Allowing nothing whatever for expenses, a member entering at 18 years of age should pay on the mortality basis \$6.66 for the first year's insurance, \$6.93 for the second year, \$7.01 for the third year, and when he reaches 60 he should pay for that year's insurance \$29 17. The Home Circles Society insures him at 18 years of age for \$6 00; at 19 for \$6 00; and at 60 years of age still at \$6 00. Not only so, the Society sometimes foregoes a monthly assessment; as though the society's certificate were not month by month approaching maturity like the debenture issue of a municipality or any other converging series of obligations.

Furthermore the Society has grafted on its certificate an endowment feature which promises to pay in cash to the assured upon reaching a certain birthday half the amount insured upon his life. (Const. and Laws, 1895, p. 44.) To provide for this heavy undertaking the Society now funds 10 per cent. of the small premium above assumed to be wholly devoted to the ordinary life insurance and as already stated, wholly insufficient to provide for that insurance alone. To illustrate the utter insufficiency of this provision for the endowment feature of the Society's certificate, I shall assume the Society's certificate to be for a \$1,000, half payable to the assured on reaching the expectancy age. And shall take the case of two certificate-holders one entering at 21, and the other at 43; the premium being equal to 12 assessments a year the whole sum assumed to be paid at the beginning of the year. Then for comparison are shown in parallel columns the net level annual premiums which the mortality tables show to be the mathematical equivalent of the endowment insurances, nothing whatever being allowed for expenses.

These tables of themselves show the seriousness of the Society's responsibilities and the extreme difficulty of the task cast upon the Committee. In 1885 this Society without actuarial assistance or advice (which a few years ago was not in this Province easily procurable) launched a scheme of insurance benefits and premiums having no mathematical or business relation the one to the other, and the insurance promised being in all cases out of all proportion to the premiums charged. Some of the more thoughtful officers have from the first uttered words of warning but it was always hoped that in some unexplained way "lapses" would balance the account. If the lapsing member were healthy, and were paying a remunerative premium for his insurance, nothing is more certain than that his lapse would injure, not benefit the Society. On the other hand, if he was receiving more insurance from the Society than he was paying for, it is equally clear that his lapse would leave no profit to the Society.

The Committee apparently shrank from proposing any radical reform in the financing of the society and limited their action to an increase in the premiums payable by persons heretofore or hereafter entering the society at ages 35 and upwards. The rates for ages 18 to 35th birthday are left unchanged. But from the appended table it is plain that the premium rates are ruinously low along the whole line.

The Committee say "We do not recommend for the present any change in the scheme of the life expectancy reserve fund, already adopted by the Supreme Circle." The committee do not seem to recognize the near danger that threatens the Society from these now fast maturing expectancies or endowments. In 1892 I called attention to this matter when the society first applied for registry; and I earnestly urged that this dangerous liability be got rid of altogether, unless the members were willing to pay a premium adequate to provide the endowments at maturity. All that was then done was to set aside and fund for this liability 10 per cent. of the already insufficient life insurance assessments. From the illustrations given in the foregoing table it is perfectly obvious that the maturing endowments must speedily overtake and outrun this endowment or "expectancy" fund. A single example will show the utter improvidence and unreason of this endowment scheme. A member enters the society at 44 years of age and takes an insurance certificate for \$1,000. Assuming that he is assessed 12 times a year, he pays annually in full of his insurance, life and endowment, 12 times 85 cents or \$10.20; and of this sum 10 per cent. or \$1.02 is his annual premium for \$500 endowment payable at 70, that is payable 26 years hence. When he reaches 70 he will then have paid for his \$500 endowment 26 sums each of \$1.02. These sums if funded and improved annually by the society at 4½ per cent. compound interest will amount in those 26 years to

\$50 71. That is to say the society by the most careful and continuous investment of his money can make it amount to only \$50 71, but has somehow or somewhere to find money to pay him \$500 or nearly ten times as much. No usurer in the land would impose upon his victim such a monstrous bargain as the members of this Society are now imposing upon themselves for the benefit of the few first maturing endowments. On an endowment of \$500, how is the difference between \$50.71 and \$500 to be obtained? It cannot be argued that the difference will be made good by the longer contribution of the younger members to the fund. For suppose a member enters at the lowest age, 18, his annual contribution to the fund on the basis of 12 assessments a year will be 60 cents, so that when he becomes entitled to his endowment of \$500 he will have made 47 yearly payments each of 60 cents to the fund. These sums improved yearly at 4½ per cent compound interest will amount to only \$96 35; but he will receive from the society \$500 or between five and six times as much. In this the most favorable case for the Society there will be on an endowment of \$500 a deficit of \$403.65. The older the member the greater the deficit; and if the endowment instead of being \$500, were \$1,000 or \$1,500 the deficit would of course be doubled or trebled.

It is a total misuse of this Society to convert it into an institution for the purpose of paying to the first 100 or 150 matured endowments those extortionate returns upon their petty contributions, and then throw the Society into bankruptcy because unable, as it would be unable, to continue such payments. At December 31st, 1895, the amount of the endowments in force reached the vast sum of \$8 601 500, in 10,174 certificates, or on an average about \$845 per certificate. Each one of the certificate-holders has an equal right to demand of the society that year by year the proper provision be laid up for his certificate so as to pay his endowment at maturity. Our law does not authorize or contemplate a class of preferred or "ground-floor" certificate holders. Taking the average endowment at \$345, as above, the payment of 50 certificates would completely exhaust the present accumulation and leave the society bankrupt as to the remaining 1,124 certificates. The by-law under which this irrational and utterly hopeless scheme of endowments was tried should be rescinded at the very earliest moment.

The strength and efforts of the Society should be concentrated upon the life insurance branch, so that if possible this branch may be saved. The suffering caused by the failure of a life insurance society is very great, and it falls upon the most helpless classes of the community. There are now in the society a large number of persons who from age or ailments, have become uninsurable elsewhere. There is, at present, no insurance fund apart from the above small endowment fund; and as is apparent from the appended table, the present level premium asked by the society at each age, is less than half the net level premium which the experience of insurers of lives shows will sooner or later be absolutely necessary if the Society is to meet its liabilities.

To strengthen the life insurance branch, the endowment branch should be at once abolished; the endowment fund should be transferred to the life insurance branch and increased as rapidly as possible. Ages should be graded by single years, not by groups of years. The monthly assessment should be increased along the whole line, and at least 12 assessments collected in each year. The members cannot possibly expect the present illusory system to continue, which is an attempt to get something for nothing. The members have hitherto been getting their insurance at a rate far below cost, and are, from an actuarial point of view, largely in debt to the society. If this debt is forgiven, and these members are asked to contribute the increased rate only as to their future assessments, they should be well satisfied, particularly as they will be amply repaid for the increase in rates by the greatly increased security of their policies.

The Committee do not appear to me to have fully realized how serious the financial position of the Society is, or how important it is to take action before further complications arise. I am unable therefore to regard the Committee's proposals as an adequate solution of the present difficulties, or as sufficient to place the society upon a satisfactory basis.

(Signed,)

J. HOWARD HUNTER,
Registrar of Friendly Societies.

III.—MINORITY REPORT.

[NOTE—This Report was not received by the Registrar of Friendly Societies until after he had delivered out his finding upon the Majority Report.]

Minority Report of James Walter Curry a member of the Life Expectancy Committee of the Canadian Home Circles to the Supreme Leader, Officers and Members of the Supreme Circle.

The undersigned, a member of your Committee appointed at the last Annual Meeting of the Supreme Circle under a Resolution to be found at page 102 of the Journals of Proceedings, begs to report as follows:

I do not concur in the Report of the other members of your Committee for the following reasons:

The remedies proposed by the other members of your Committee are not, in my opinion, sufficient to ensure the financial permanency of this Order. I am of the opinion that the only safety for this Order is to raise the rates charged to and payable by each member of the Order to an amount agreed upon by actuaries as being the amount absolutely necessary to pay the actual cost of carrying the insurance. I append herewith at table prepared by Mr. A. Blackadar, an actuary in the employ of the Department at Ottawa. I would recommend the adoption of his figures for each age and the doing away of groups of ages as we have them in our Order. I would recommend the doing away with the Life Expectancy features of our Certificates and the placing of the Life Expectancy reserve to the credit of the Life Benefit fund.

I would earnestly caution the members of this Order against allowing the assessments to be made in the future upon the rates charged in the past, against the grouping of ages and against the waiver of assessments. It is important to the older members of this

Order to weigh well this caution as in case this Order should fail they will have reached such an age as will make it impossible for them to obtain insurance either in a beneficiary order or in any of our numerous stock companies.

In making the above recommendations I have only the best interests and permanency of the Order at heart.

All of which is respectfully submitted.

Dated at Toronto this 30th day of October, A.D. 1896.

 PREMIUMS FOR SICK BENEFITS.

The following table (Table II) has been prepared by Mr. W. Williams, Permanent Secretary of the Ancient Order of Foresters, Subsidiary High Court of Canada. The table is founded upon the "Leicester Table," which represents the English experience (369 655 members, rural, town and city districts combined) of the Ancient Order of Foresters, 1871 5, as tabulated by the eminent actuary, Mr. Neison, and published by the Order in 1882. At the Leicester meeting of the High Court in 1886 the table now known as the "Leicester Table" was adopted, and at the Brighton meeting, 1895, it was made obligatory upon all Courts and members of the Order from and after 1st January, 1896. In the present table Mr. Williams has slightly reduced a few of the Leicester rates to conform to the experience of the Order in Canada.

The following are the laws of the Ancient Order of Foresters (England), enacted at the Brighton meeting, 1895, to put in force the Leicester Table, and to ascertain upon that basis the solvency of each Court of the Order :—

"27a.—Sec. 1. When a District sends in the valuation returns of its Courts to the Executive Council, it shall be the duty of the officers of the District to supply the Council (upon a form to be sent to the District) with a list of those Courts which have a relative degree of solvency less than 17s. 6d. in the £1.

"Sec. 2. On receipt of any such Schedule from a District, or the Valuation Report of a Court out of District, the Executive Council shall take steps to compel all Courts having a relative degree of solvency of 15s. or less in the £1, to take immediate action to place themselves in more solvent positions, by adopting (if not already adopted) graduated scales of contributions and benefits, from the General Law Tables, for all members at their ages at entry; and it shall be the duty of the Executive Council to call upon Districts (if the Courts are in Districts) to see that all the Courts carry out the above.

"(A) Courts failing to comply with the requirement laid down shall be debarred applying to the High Court of the Order for any relief for their members, or themselves as Courts; and if any Court refuse or neglect to comply within twelve months to adopt General Law Tables, as above required, *such Court shall be suspended the Order.*

"(B) When any Court or Courts in Districts have a relative degree of solvency of 15s. or less in the £1, they shall bring the matter before the next District meeting after receiving the Valuer's Report, and the District shall thereupon require the adoption, for all members, of a graduated scale of contributions, according to one or more of the tables given at the end of these General Laws, based on their ages at entry, and on a rule to effect this object being registered, the District Officers shall have power to authorize the circulation of a petition throughout the District on behalf of such Court or Courts, when any Court in the same District having a surplus, at a summoned meeting, may vote any sum or sums not exceeding 25 per cent. in the aggregate of such surplus, towards the assistance of the first mentioned Court or Courts.

"Sec. 3. On the receipt of any such Schedule from a District, or the Valuation Report of a Court out of a District, it shall be the duty of the Executive Council to call upon Courts with more than 15s. but less than 17s. 6d. in the £1, to consider the recommendation (if any) of the valuer, with a view to the improvement of the position of the Courts. All members of such Courts having less than 17s. 6d., and more than 15s. in the £1, shall pay contributions according to age at entry at least equal to those charged by the Court to new members."

TABLE II.—Table of Net Annual Premiums for a Sick Benefit of \$1 per week, the sickness having a maximum continuance of 6, 12, and 24 months respectively: lapses allowed for, and no expenses included.—Interest 4 per cent.

NOTE.—*Applications of Table II.* This table being calculated for a weekly benefit of \$1, if the benefit actually payable by the Society is any other sum per week, the premium figures as shown in the table must be multiplied by the actual benefit.

Ex. 1. A member at age 21 enters a society which gives a sick benefit of \$4 per week for a maximum continuous sickness of 26 weeks, find the net level annual premium payable monthly in advance. Here from column 2 in line with age 21 we find \$1.073. This is the premium for a sick benefit of \$1 per week; but in the case supposed the benefit is \$4 per week; and therefore the premium required is $\$1.073 \times 4$ or \$4.292, *i. e.*, practically \$4.29. Similarly, if the benefit were \$3 per week the premium would be $\$1.073 \times 3$ or \$3.219; and if the benefit were only 80 cents per week the premium would be $\$1.073 \times .80$ or \$8584, or practically 86 cents.

Ex. 2. If in *Ex. 1.* the benefit instead of being restricted to a maximum continuous sickness of 26 weeks, were, under the constitution and laws of the society, payable for a maximum period of 52 weeks, then the premium payable for a weekly benefit of \$1 is the sum of the figures in columns 2 and 3 opposite the given age. Thus, in the case of a member entering the Society at 21, the premium for a weekly sick benefit of \$1 per week would be $\$1.073 + .155$ or \$1.228, and for a sick benefit of \$4 per week would be $\$1.228 \times 4$ or \$4.912; for a sick benefit of \$3 per week, would be $\$1.228 \times 3$ or \$3.684; and for a sick benefit of 80 cents per week would be \$.9824 or practically 98 cents.

Similarly, if the benefit were for a maximum continuous sickness of 24 months the premium for a weekly sick benefit of \$1 per week, would be the sum of the figures in columns 2, 3 and 4, (*i. e.* the total shown in column 5,) opposite the given age. Thus in the case of a member entering the Society at 21 the premium for a weekly sick benefit of \$1 per week would be \$1.362; for a benefit of \$4 per week would be $\$1.362 \times 4$.

Ex. 3. Find the net level annual premium payable monthly in advance for a sick benefit for a maximum continuous sickness of 52 weeks; the benefit to be \$4 for the first 26 weeks and \$2 per week for the next 26 weeks, the age of the entering member being 21. Here from column 2 the portion of the premium for the first 26 weeks will be $\$1.073 \times 4$ or \$4.292; and from column 3 the portion for the 2nd 26 week will be $\$.155 \times 2$ or \$.310; so that the whole premium will be $\$4.292 + .310$ or \$4.602.
